**Optimal Control of Vehicles with
Advanced Powertrain System
in Terms of Energy Efficiency**

Optimal Control of Vehicles with Advanced Powertrain System

in terms of Energy Efficiency

Optimale Regelung von Fahrzeugen mit fortgeschrittenem Antriebssystem

hinsichtlich der Energieeffizienz

Vom Fachbereich Elektrotechnik und Informationstechnik
der Technischen Universität Kaiserslautern
zur Verleihung des akademischen Grades
Doktor der Ingenieurwissenschaften (Dr.-Ing.)
genehmigte Dissertation

von

M. Sc. Guoqiang Li

Acknowledgment

This dissertation summarizes the unforgettable and meaningful time over the past three years and four months at the Juniorprofessorship for Electromobility in the Department of Electrical and Computer Engineering, University of Kaiserslautern. It would not have been possible without the help, guidance and encouragement from my supervisor, colleagues, friends and families.

First and foremost, I would like to express my deepest gratitude to my advisor Jun.-Prof. Dr.-Ing. Daniel Görges for his continuous guidance, mentoring and inspirations during my research. I am grateful for him to accept me into his group in 2015. He is always willing to help me and provide opportunities for me to take part in international scientific conferences. It has been a great pleasure to be a doctoral student under his supervision. Thank him so much for his generous time and support for the scientific discussion on my work and tireless efforts on revision of papers.

Furthermore, I would give my gratitude to Prof. Dr.-Ing. Roman Teutsch for his interest in my research and joining the dissertation committee as a reviewer. I also want to thank Prof. Dr.-Ing. Steven Liu for joining the thesis committee as a chairman.

Many thanks also go to the members in the Juniorprofessorship for Electromobility and the Institute of Control Systems, including M.Sc. Giuliano Costantini, Dipl.-Ing Tobias Lepold, M.Sc. Xiaohai Lin, M.Sc. Guihai Luo, M.Sc. Tobias Peschke, M.Sc. Ramin Rostami, M.Sc. Andreas Weißmann, M.Sc. Yakun Zhou, M.Sc. Alen Turnwald, M.Sc. Filipe Figueiredo, M.Sc. Hengyi Wang, M.Sc. Jawad Ismail, M.Sc. Markus Lepper, M.Sc. Markus Bell, Dr.-Ing. Yun Wan, M.Sc. Yanhao He, M.Sc. Min Wu, Dipl.-Ing. Felix Berkel, M.Eng. Sebastian Caba, M.Sc. Xiang Chen, M.Sc. Benjamin Watkins, M.Sc. Hafiz Kashif Iqbal, M.Sc. Muhammad Ikhsan, M.Sc. Pedro Dos Santos, Dr.-Ing. Fabian Kenel, M.Sc. Tim Steiner, Swen Becker, Thoms Janz, and Jutta Lenhardt. I would also like to thank Prof. Heyan Li and Prof. Biao Ma for their care and encouragement.

Moreover I want to thank the China Scholarship Council (CSC) for providing financial support during my study.

Lastly and most importantly, I would like to thank my mother Fenping Li, who gave me life, support and understanding in the past thirty years. I will spare every effort to repay her endless love.

Kaiserslautern, April 2019

Contents

List of Tables	V
List of Figures	IX
List of Abbreviations	XIII
List of Symbols	XV
1 Introduction	1
1.1 Motivation	1
1.1.1 Energy Requirement and Air Pollution	1
1.1.2 Pathways to Reduce Fuel Consumption and Emissions	4
1.1.3 Driving Comfort	6
1.2 Objectives	7
1.3 Outlines and Contributions	8
2 Background and Related Work	11
2.1 Dual Clutch Transmissions	11
2.1.1 Control Strategy for Clutch Shift	12
2.1.2 Technical Challenges for DCTs Control	13
2.2 Hybrid Electric Vehicles	13
2.2.1 Energy Management Strategies for HEVs	14
2.2.2 Engine Transient Emission	17
2.2.3 Technical Challenges for Energy Management	19
2.3 Adaptive Cruise Control	19
2.3.1 Vehicle Longitudinal Motion Control	19
2.3.2 Technical Challenges for ACC	21
3 Optimal Control of DCTs for Shift Smoothness	23
3.1 Introduction	23
3.2 Linear Quadratic Optimal Control	24
3.3 Powertrain System and Problem Statement	24
3.3.1 Gear Shift Process of DCTs	24
3.3.2 Control Requirements	26
3.4 System Model and Optimal Shift Control	26
3.4.1 Torque Phase	26

3.4.2	Inertia Phase	31
3.4.3	Observer Design	35
3.5	Simulation Comparisons	37
3.6	Summary	43
4	Integrated Energy Management and Shift Control for HEVs	45
4.1	Introduction	45
4.2	Optimal Control Method	46
4.2.1	Dynamic Programming Principle	46
4.2.2	Model Predictive Control	47
4.3	System Model of HEVs	47
4.4	Energy Management Strategy for HEVs	49
4.4.1	Control Problem Formulation	49
4.4.2	Drivability Discussion	50
4.4.3	Constant Weighting Factor	51
4.4.4	Shift Frequency Issue	52
4.4.5	Varying Weighting Factor	53
4.4.6	Engine Transient Working Issues	55
4.5	Engine Torque Smoothing Control	55
4.5.1	MPC for Engine Torque Constraint Satisfaction	56
4.5.2	Integrated Shift Control and Energy Management	57
4.5.3	Simulation Study	57
4.6	Summary	62
5	Adaptive Energy Management Strategy for HEVs	63
5.1	Introduction	63
5.2	Artificial Neural Network	64
5.3	Approximate Dynamic Programming	65
5.3.1	Problem Formulation	66
5.3.2	Iterative Learning with ADP	67
5.3.3	Actor-critic Structure	67
5.3.4	Critic Network and Online Learning	68
5.3.5	Action Network and Online Learning	70
5.4	Optimal Control Problem for the Energy Management Strategy	72
5.5	Combined Gear Shift and Power Split Control for HEVs	73
5.5.1	Control Algorithm	73
5.5.2	Gear Shift Schedule Design based on NN	74
5.5.3	Learning Algorithm for the Power Split	77
5.5.4	Simulation Study	78
5.6	Energy Management Strategy for HEVs based on SADP	86
5.6.1	Controller Design based on SADP	86
5.6.2	Simulation Study	91
5.6.3	Velocity Prediction	94
5.6.4	Energy Management with Velocity Prediction	97

5.7	Discussion	99
5.8	Summary	102
6	Adaptive Cruise Control for Fuel Economy and Driving Safety	105
6.1	Introduction	105
6.2	ACC Model and Controller Design	106
6.2.1	Dynamic Car-following Model	106
6.2.2	Control Problem Formulation for ACC	107
6.2.3	Control Algorithm and Simulation	108
6.3	Ecological Adaptive Cruise Control and Energy Management for HEVs	111
6.3.1	Control Algorithm for ECO-ACC	111
6.3.2	Intelligent Energy Management Strategy for HEVs	111
6.3.3	Simulation Analysis for ECO-ACC	116
6.4	Ecological Adaptive Cruise Control for Conventional Vehicles	119
6.4.1	Control Problem Formulation	119
6.4.2	Controller Design	121
6.4.3	Simulation Study	122
6.5	Summary	129
7	Conclusions and Future Work	131
7.1	Conclusions	131
7.2	Future Work	132
