

# **Fast Analytical Assessment of the Signal Quality in Transparent Optical Networks**

Genehmigte Dissertation  
zur Erlangung des akademischen Grades  
Doktor der Ingenieurwissenschaften (Dr.-Ing.)  
der Fakultät für Elektrotechnik und Informationstechnik  
der Universität Dortmund

von  
Dipl.-Ing. Stephan Pachnicke, MSc.

|                              |                             |
|------------------------------|-----------------------------|
| Hauptreferent:               | Prof. Dr.-Ing. E. Voges     |
| Korreferent:                 | Prof. Dr.-Ing. K. Petermann |
| Dissertation eingereicht am: | 11. April 2005              |
| Tag der mündlichen Prüfung:  | 28. Juli 2005               |

Berichte aus der Elektrotechnik

**Stephan Pachnicke**

**Fast Analytical Assessment of the Signal Quality  
in Transparent Optical Networks**

D 290 (Diss. Universität Dortmund)

Shaker Verlag  
Aachen 2005

| 2.5 Mitigation of Signal Impairments .....               | 10        |
| 2.5.1 Optical PMD Compensators .....                     | 11        |
| 2.5.2 Electrical PMD Compensators .....                  | 13        |
| 2.5.3 Forward-Error Correction (FEC) .....               | 13        |
| 2.6 Increasing the Fiber Capacity .....                  | 14        |
| <b>3 Evolution of Fiber Optical Networks</b> .....       | <b>15</b> |
| 3.1 Electrical Cross Connects (EXC) .....                | 15        |
| 3.2 Transparent Optical Networks .....                   | 16        |
| 3.2.1 Static Path Setup .....                            | 16        |
| 3.2.2 Dynamic Path Setup .....                           | 16        |
| 3.3 Optical Packet Networks .....                        | 20        |
| 3.3.1 Optical Burst Switching .....                      | 20        |
| 3.3.2 Optical Packet Switching .....                     | 22        |
| 3.4 Constraint-Based Routing .....                       | 22        |
| 3.4.1 Demands of the Market and Possible Solutions ..... | 23        |
| 3.4.2 Characterization of the Signal Quality .....       | 25        |
| <b>4 Simulation and Experiments</b> .....                | <b>29</b> |
| 4.1 Modeling of Fiber Optical Networks .....             | 29        |
| 4.1.1 Attenuation and Dispersion .....                   | 29        |
| 4.1.2 Nonlinear Fiber Effects .....                      | 32        |
| 4.1.3 Coupled-Nonlinear Schrödinger Equation .....       | 36        |
| 4.1.4 Split-Step Fourier Method .....                    | 37        |

|          |   |            |
|----------|---|------------|
| 4.1.5    | Modeling of Polarization-Mode Dispersion .....  | 38         |
| 4.1.6    | Modulation Formats .....  | 40         |
| 4.1.7    | Fiber Amplifiers .....  | 44         |
| 4.1.8    | Receiver.....   | 47         |
| 4.2      | The Simulation Tool: PHOTOSS .....  | 49         |
| 4.3      | Experiment Setup .....  | 51         |
| <b>5</b> | <b>Fast Analytical Models.....</b>  | <b>53</b>  |
| 5.1      | Cross-Phase Modulation (XPM).....   | 53         |
| 5.1.1    | Theory of Cross-Phase Modulation .....  | 54         |
| 5.1.2    | Parallel Input Polarization of the WDM Channels .....   | 55         |
| 5.1.2.1  | Analytical Models for the Assessment of XPM .....   | 56         |
| 5.1.2.2  | Simplified Analytical Models .....  | 59         |
| 5.1.2.3  | Experimental Verification of XPM Models for 10 Gb/s NRZ Systems .....                         | 66         |
| 5.1.2.4  | 40 Gb/s NRZ-Modulated Transmission Systems .....  | 69         |
| 5.1.2.5  | 10 Gb/s RZ-Modulated Transmission Systems .....   | 70         |
| 5.1.3    | Arbitrary Input Polarization of the WDM Channels .....  | 72         |
| 5.1.3.1  | Published Experiment Setups .....   | 72         |
| 5.1.3.2  | Fast Analytical Models for the Assessment of Ultra-Fast XPM Effect .....                      | 74         |
| 5.1.3.3  | System Simulations.....   | 76         |
| 5.1.3.4  | Full-Inline Dispersion Compensation.....  | 78         |
| 5.1.3.5  | Distributed Undercompensation of the Dispersion .....   | 79         |
| 5.1.3.6  | Comparison of the Different Inline Dispersion Compensation Maps and the Analytical Model..... | 80         |
| 5.2      | Four-wave mixing (FWM) .....  | 82         |
| 5.2.1    | Theory of Four-Wave Mixing .....  | 82         |
| 5.2.2    | Parallel Input Polarization of the WDM Channels .....   | 86         |
| 5.2.2.1  | Fast Analytical Models .....  | 86         |
| 5.2.2.2  | Duobinary-Modulated Transmission Systems.....   | 92         |
| 5.2.2.3  | Experimental Verification.....  | 93         |
| 5.2.3    | Arbitrary Input Polarization of the WDM Channels .....  | 96         |
| 5.3      | Stimulated Raman Scattering (SRS) .....   | 99         |
| 5.3.1    | Theory of Stimulated Raman Scattering .....   | 99         |
| 5.3.2    | Intensity Modulated Transmission Systems .....  | 102        |
| 5.3.2.1  | Transmission Fibers without Local Dispersion (DSF) .....                                      | 102        |
| 5.3.2.2  | Transmission Fibers with Local Dispersion (NZDSF and SSMF).....                               | 104        |
| 5.4      | Self-Phase Modulation (SPM) .....   | 108        |
| 5.4.1    | Theory of Self-Phase Modulation .....   | 108        |
| 5.4.2    | Intensity Modulated Transmission Systems .....  | 109        |
