

Beiträge zur Didaktik

Ingo Eilks, Silvija Markic & Bernd Ralle

Science Education Research and Practical Work

A collection of invited papers inspired by the 23rd Symposium
on Chemistry and Science Education
held at the TU Dortmund University, May 26-28, 2016

Shaker Verlag
Aachen 2016

Bibliographic information published by the Deutsche Nationalbibliothek

Contents

Introduction <i>Ingo Eilks, Silvija Markic and Bernd Ralle</i>	1
What research says about practical work in science teaching and learning: What do we know and what do know only vaguely? <i>Avi Hofstein</i>	3
From elaboratory to e-laboratory: On the history of practical work in school science <i>Peter E. Childs and Aishling Flaherty</i>	13
Understanding science as a cultural practice from re-enacting historical experiments <i>Peter Heering</i>	27
How to identify and encourage scientifically interested students through laboratory work <i>Sandra Frach and Bernd Ralle</i>	39
Student learning processes in classroom and remote laboratory settings <i>David F. Treagust, Damien J. Carter, Euan D. Lindsay, Marjan G. Zadnik, Mauro Mocerino and Anthony D. Lucey</i>	49
Microscale experimentation in chemistry classes: A case study of its implementation with chemistry teachers <i>Muhamad Hugerat, Ahmad Basheer, Riam Abu-Much and Naji Kortam</i>	61
Pupil research briefs – Implementation of the project chain reaction in Georgia <i>Marika Kapanadze, Natela Bagatrishvili and Ekaterine Slovinsky</i>	71
Alternative experiences in the undergraduate chemistry laboratory considering the Brazilian context: Beyond the synthesis of methyl salicylate <i>Dorai P. Zandonai, Karla C. Saqueto, Ana P. Lopes and Vânia G. Zuin</i>	81
Cultural background and the science laboratory learning environment: The Malaysian lower secondary students' perspective <i>Mageswary Karpudewan and Chua Kah Eng</i>	93
Different faces of practical work: Activity-based instruction and its impact on learning <i>Maria T. Oliver-Hoyo</i>	105
To DAPS or to IAPS: That is the question <i>Ian Abrahams, Michael J. Reiss and Rachael Sharpe</i>	119

How to promote relevant practical work in science education through a non-formal learning environment? <i>Maija Aksela and Veli-Matti Ikävalko</i>	131
Supporting practical science learning for all students – A German cross-country initiative in non-formal chemistry education <i>Fiona Affeldt, Juliane Wichmann, Antje Siol, Silvija Markic and Ingo Eilks</i>	141
Effects of out-of-school science laboratories' preparation and post enhancement <i>Matthias Streller, Gesche Pospiech and Avi Hofstein</i>	155
Practical work in science with visually impaired students <i>Mustafa Sözbilir</i>	169
Learning in the tertiary level chemistry laboratory: What we have learnt from phenomenology research <i>Santiago Sandi-Urena and Matthew J. Chrzanowski</i>	181
Experiments in science instruction: For sure! Are we really sure? <i>Peter Labudde and Seamus Delaney</i>	193
Explaining science: Using a “performance test” to assess physics teachers' explaining skills <i>Christoph Kulgemeyer</i>	205
Study programmes and practical work for chemistry student teachers in Bosnia and Herzegovina <i>Meliha Zejnilagić-Hajrić and Ines Nuić</i>	215
The impact of research-based laboratory activities on the students' affective experience <i>Snježana Smerdel and Meliha Zejnilagić-Hajrić</i>	221
„Kitchen Chemistry“ in Croatian kindergartens and primary schools <i>Lana Šarić</i>	227
Practical work provoked and promoted by the history of science: A way into the nature of chemistry <i>John Oversby</i>	233
Practical work, cooperative learning and internet forums – An example on teaching about the chemistry of water <i>Johanna Dittmar and Ingo Eilks</i>	239
Bubbles in tea: no! - bubbles in class: yes! - Examples from the TEMI project in Germany <i>Johanna Dittmar, Christian Zowada, Shuichi Yamashita and Ingo Eilks</i>	245

Courses on teaching with mysteries incorporated in the Czech republic <i>Milada Teplá, Eva Stratilová Urvádková and Hana Čtrnáctová</i>	253
The murder of jeweler Beketov - Teaching electropotential series with TEMI <i>Miroslav Pražienka, Pavel Teplý, Petr Šmejkal, Milada Teplá and Hana Čtrnáctová</i>	259
To develop, implement and evaluate a transition year module based on the principles of the teaching enquiry with mysteries incorporated project <i>Laurie Ryan and Peter E. Childs</i>	265
Enquiry-based science education in Austrian teacher professional development courses <i>Elisabeth Hofer, Anja Lembens and Simone Abels</i>	271
Parents and students cooperatively experience chemistry <i>Silvija Markic, Katharina Schneider and Anja Wessels</i>	279
Language across the curriculum: A learning-setting for future chemistry teachers <i>Cana Bayrak and Bernd Ralle</i>	285
Graduate teaching assistants and holistic learning in the general chemistry laboratory sessions <i>Aishling Flaherty, Anne O'Dwyer, Peter E. Childs and Sibel Erduran</i>	291
The influence of learning in a non-formal student laboratory on the quality of motivation <i>Marianna Leuckefeld</i>	297
Lesson learned from a survey on incorporating green chemistry into higher chemistry education in Germany <i>Nina Hamidah, Susy Yunita Prabawati, Imelda Fajriati and Ingo Eilks</i>	303
The relationship between prior knowledge, aim orientation and course success in the undergraduate chemistry lab <i>Thomas Elert and Maik Walpuski</i>	309
Context-based learning and practical work at the basci-lab Bremen - Issues and challenges <i>Doris Elster and Julia Birkholz</i>	315
Reflections on science education research and practical work <i>Ingo Eilks, Avi Hofstein, Rachel Mamluk-Naaman, Silvija Markic, John Oversby, David F. Treagust and Bernd Ralle</i>	323
Corresponding authors	329
