

# Deregulation and Bank Performance: An Empirical Study for the US

Inaugural-Dissertation  
zur Erlangung des Grades eines Doktors  
der Wirtschafts- und Gesellschaftswissenschaften  
durch die  
Rechts- und Staatswissenschaftliche Fakultät  
der Rheinischen Friedrich-Wilhelms-Universität  
Bonn

Vorgelegt von LIN, LIN  
aus Shanghai, Volksrepublik China  
01.09. 2006

Dekan: Prof. Dr. Johannes Köndgen

Erstreferent: Prof. Dr. Jürgen von Hagen

Zweitreferent: Prof. Dr. Erik Theissen

Tag der mündlichen Prüfung: 01.09.2006

Gedruckt mit Unterstützung des Deutschen Akademischen Austauschdienstes

Berichte aus der Volkswirtschaft

## *Acknowledgements*

This dissertation presents the research results of my four-year Ph.D. study at University of Bonn, Germany. This doctoral thesis would not have been possible without the strong support of a number of people and organization. First of all, I would like to express my sincere thanks to Prof. Dr. Jürgen von Hagen, director of the Center for European Integration Studies (ZEI) and Institut für Internationale Wirtschaftspolitik (IIW). He provides me a friendly environment for research, supervising my research with his insightful views and comments. I am indeed grateful to his strong support in each stage of my study and life in Germany during the past four years.

I would also like to acknowledge Prof. Dr. Erik Theissen for taking the role of second supervisor, and for his inspiring and insightful comments throughout the whole dissertation. Prof. Dr. Jörg Breitung offers me econometric lecture in relevant fields and writes strong recommendation letter for my scholarship. I owe gratitude to these professors.

I thank Deutscher Akademischer Austauschdienst (DAAD) for grating me scholarship from 2002 to 2006. Without the DAAD scholarship, it is less likely that I would smoothly pursue my Ph.D. study in Germany.

My thanks also go to colleagues and good friends in Bonn. Particularly, I would like to thank Dr. Valeriya Dinger for her inspiring suggestions and comments on my research. I would also like to thank Haiping Zhang, Jizhong Zhou and Daniela Treutlein and other ZEI colleagues for their discussions and comments, and Hadya Eisfeld for her editorial assistance.

Finally, and most importantly, I am deeply indebted to my families for their love, understanding and moral support throughout the years. My gratitude to them is beyond any words. I dedicate this dissertation to them.

## ***Table of Contents***

|                                                                                                                         |           |
|-------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>CHAPTER 1 GENERAL INTRODUCTION .....</b>                                                                             | <b>1</b>  |
| 1.1. Overview on banks' securities activities: Regulatory evolution.....                                                | 1         |
| 1.1.1. <i>The Glass-Steagall Act and its background</i> .....                                                           | 1         |
| 1.1.2. <i>The erosion of the Glass-Steagall Act and passage of the Financial Service Modernization Act</i> .....        | 3         |
| 1.1.3. <i>Banks in securities activities: why it matters?</i> .....                                                     | 8         |
| 1.2. Structure of the dissertation: .....                                                                               | 10        |
| <b>CHAPTER 2 BANKS IN SECURITIES BUSINESS: ADVANTAGES AND DISADVANTAGES.....</b>                                        | <b>13</b> |
| 2.1. Theoretical arguments on banks conducting securities activities .....                                              | 13        |
| 2.1.1. <i>Profitability</i> .....                                                                                       | 13        |
| 2.1.2. <i>Bank risks</i> :.....                                                                                         | 16        |
| 2.1.3. <i>Efficiency</i> : .....                                                                                        | 20        |
| 2.2. The effects of bank securities activities revisited: historical evidence .....                                     | 23        |
| 2.2.1 <i>Introduction</i> .....                                                                                         | 23        |
| 2.2.2. <i>Relatively low risk of banks with securities activities</i> .....                                             | 24        |
| 2.2.2. <i>Weak evidence on conflicts of interest</i> : .....                                                            | 26        |
| 2.3. Contemporary survey on banks' securities activities.....                                                           | 28        |
| 2.3.1. <i>Bank profitability</i> : .....                                                                                | 29        |
| 2.3.2. <i>Bank risks</i> :.....                                                                                         | 34        |
| 2.3.3. <i>Bank efficiency</i> .....                                                                                     | 38        |
| 2.4. Conclusion .....                                                                                                   | 40        |
| <b>CHAPTER 3 BANKS' SECURITIES TRADING, UNDERWRITING AND FIDUCIARY ACTIVITIES.....</b>                                  | <b>42</b> |
| 3.1. Securities trading .....                                                                                           | 43        |
| 3.1.1. <i>Definition of trading securities</i> .....                                                                    | 44        |
| 3.1.2. <i>Costs and benefits of securities trading activities</i> : .....                                               | 44        |
| 3.1.3 <i>Regulation on the securities trading activities</i> .....                                                      | 46        |
| 3.2. Underwriting.....                                                                                                  | 47        |
| 3.2.1 <i>Definition of securities underwriting activities</i> .....                                                     | 48        |
| 3.2.2. <i>Costs and benefits of securities underwriting</i> .....                                                       | 51        |
| 3.2.3. <i>Conflicts of interest and regulatory firewalls</i> .....                                                      | 52        |
| 3.3 Fiduciary activities.....                                                                                           | 54        |
| 3.3.1. <i>Definition of fiduciary activities</i> .....                                                                  | 54        |
| 3.3.2. <i>Conflicts of interest and regulations</i> .....                                                               | 56        |
| 3.3.3. <i>Costs and benefits of fiduciary activities</i> .....                                                          | 58        |
| <b>CHAPTER 4 THE CONSEQUENCES OF SECURITIES ACTIVITIES FOR THE PROFITABILITY OF US BANKS .....</b>                      | <b>62</b> |
| 4.1. Introduction.....                                                                                                  | 62        |
| 4.2. Data .....                                                                                                         | 64        |
| 4.3. Empirical evidence on the profitability effects of securities activities: Linear regression with time effects..... | 66        |
| 4.3.1. <i>Linear Regression Model</i> .....                                                                             | 68        |
| <i>Dependent Variables</i> .....                                                                                        | 68        |
| <i>Explanatory Variables</i> .....                                                                                      | 69        |
| <i>Control variables</i> : .....                                                                                        | 71        |
| 4.3.2 <i>Estimation results and discussion</i> .....                                                                    | 73        |

|                                                                                                                         |            |
|-------------------------------------------------------------------------------------------------------------------------|------------|
| 4.4. Empirical evidence on the profitability effects of securities activities: Regression with quadratic function ..... | 80         |
| <i>Estimation Results and Discussion</i> .....                                                                          | 81         |
| 4.5. Conclusion .....                                                                                                   | 85         |
| Appendix:.....                                                                                                          | 87         |
| Panel regressions of three types of investment banking activities on bank profitability .....                           | 87         |
| <b>CHAPTER 5 THE EFFECT OF SECURITIES ACTIVITIES ON RISKS OF US PUBLIC LISTED BANKS</b> .....                           | <b>88</b>  |
| 5. 1. Introduction.....                                                                                                 | 88         |
| 5.2. Data sources .....                                                                                                 | 91         |
| 5.3. Risks effects of securities activities: Econometric models .....                                                   | 93         |
| 5.3.1 Total risk regression .....                                                                                       | 94         |
| 5.3.2. Market risk and interest rate risk regressions.....                                                              | 95         |
| 5.3.3. Explanatory variables and control variables .....                                                                | 98         |
| 5.4. Estimation results and discussion .....                                                                            | 102        |
| 5.4.1. Estimation results .....                                                                                         | 103        |
| 5.4.2. Discussions of the empirical results .....                                                                       | 107        |
| 5.5. Conclusion: .....                                                                                                  | 112        |
| Appendix: .....                                                                                                         | 114        |
| Panel regressions of three types of investment banking activities on bank risks, with time dummies .....                | 114        |
| <b>CHAPTER 6 SECURITIES ACTIVITIES AND BANK EFFICIENCY</b> .....                                                        | <b>115</b> |
| 6.1. Introduction.....                                                                                                  | 115        |
| 6.2. The concept of bank efficiency and econometric methodology .....                                                   | 117        |
| 6.2.1 The concept of bank efficiency .....                                                                              | 117        |
| 6.2.2. Using the stochastic frontier approach to measure bank efficiency.....                                           | 121        |
| 6.2.3. Translog cost function.....                                                                                      | 124        |
| 6.3 . Data Sources .....                                                                                                | 126        |
| 6.4. Securities activities and bank efficiency: empirical evidence .....                                                | 128        |
| 6.4.1. Efficiency estimation with Asset-Equivalent-Measure and Revenue-Based-Measure.....                               | 128        |
| 6.4.1.1.Asset-Equivalent-Measure .....                                                                                  | 131        |
| 6.4.1.2.Revenue-Based-Measure .....                                                                                     | 132        |
| 6.4.2. Testing the significance of efficiency difference.....                                                           | 134        |
| 6.4.3. Discussions about the empirical results .....                                                                    | 138        |
| 6.5. Conclusion .....                                                                                                   | 144        |
| Appendix.....                                                                                                           | 145        |
| Parameters of the translog cost functions, for asset equivalent measure and revenue-based measure .....                 | 145        |
| <b>CHAPTER 7 CONCLUDING REMARKS</b> .....                                                                               | <b>149</b> |
| 7.1 Main Findings: .....                                                                                                | 149        |
| 7.2. Directions for Further Research:.....                                                                              | 151        |
