

Gas liquid micro separation and its application to direct methanol fuel cell systems

Von der Fakultät für Maschinenbau
der Technischen Universität Carolo-Wilhelmina zu Braunschweig

zur Erlangung der Würde

eines Doktor-Ingenieurs (Dr.-Ing.)

genehmigte Dissertation

von: Dipl.-Ing. Maik Kraus
aus (Geburtsort): Plauen

Gutachter:

Frau Prof. Dr.-Ing. Ulrike Krewer	(Referent/Betreuer)
Herr Prof. Dr.-Ing. habil. Roland Dittmeyer	(Referent)
Herr Prof. Dr.-Ing. Stephan Scholl	(Vorsitzender)

2014

Berichte aus der Mikrosystemtechnik

Maik Kraus

**Gas liquid micro separation and its application
to direct methanol fuel cell systems**

Contents

Statement of authorship	v
Abstract	vii
Acknowledgment	ix
1 Introduction	1
2 State of the Art	5
3 Concept of microstructure-based separation	9
3.1 Capillary-based separation	9
3.2 Separation principle	12
3.3 Quantification of separation progress quality	15
3.4 General separator designs	18
4 Model-based analysis of microstructure-based separators	21
4.1 CFD-based analysis	21
4.1.1 Model setup	22
4.1.2 Simulation setup	23
4.1.3 Results and discussion	25
4.2 1D simulation-based analysis	32
4.2.1 Model setup	34
4.2.2 Simulation setup	48
4.2.3 Results and discussion	62
5 Experiments	73
5.1 Membrane-based micro separation	73

5.1.1	Realization of the membrane-based separators	73
5.1.2	Experimental setup	76
5.1.3	Additional equipment & chemicals	80
5.1.4	Methods of Experiment	81
5.1.5	Operating conditions	85
5.1.6	Results and discussion for liquid separation	91
5.1.7	Results and discussion for gas separation .	98
5.2	Microchannel-based micro-separation	113
5.2.1	Realization of the microchannel-based separators	113
5.2.2	Experimental setup and preparation	115
5.2.3	Results and discussion	116
6	Influence of microstructure-based separation on DMFC systems	121
6.1	Effect on DMFC system control and water level management	121
6.1.1	Feedforward control of the solution level . .	123
6.1.2	Simulation results for DMFC system with microchannel-based separator	124
6.2	Effect on the carbonate system in the DMFC system	126
6.2.1	The carbonate system in general	126
6.2.2	The carbonate system in DMFC systems .	128
6.2.3	Remarks on the carbonate system kinetics .	130
6.2.4	Influence of the gas liquid separator design on carbonate concentration	130
7	Summary	135
	Nomenclature	xi
7.1	Latin symbols	xi
7.2	Greek symbols	xii
7.3	Subscripts	xii
7.4	Superscripts	xiii
7.5	Abbreviations	xiii
	Bibliography	xv

List of Tables	xxiii
List of Figures	xxv
A Influence of micro structure-based separation on DMFC systems*	xxxiii
B Mass balance	xxxv
B.1 General formulation of mass balance	xxxv
B.2 Integration of mass balance	xxxvii
C Impulse balance	xxxix
C.1 Derivation	xxxix
C.2 Integration of the impulse balance	xl
D Integration of the energy balance	xliii
E Field functions for the states of used liquids	xlix
F Membrane	li
F.1 Derivation of the diffusive flux	li
F.2 Derivation of the convective flux	liii
G Calculation of the concentration gradient	lvii
