

# **Target-oriented Planning for Electric Distribution Grids with Smart Grid Metrics**

Zielorientierte Verteilnetzplanung mit der Smart-Grid-Metrik

vom

Fachbereich Elektrotechnik und Informationstechnik

der Technischen Universität Kaiserslautern

zur Verleihung des akademischen Grades

Doktor der Ingenieurwissenschaften (Dr.-Ing.)

genehmigte Dissertation

von

**M. Sc. Han Rui**

geb. in Jiangsu, China

Tag der Einreichung: 07.12.2016

Tag der mündlichen Prüfung: 15.05.2017

Dekan des Fachbereichs: Prof. Dr.-Ing. Ralph Urbansky

Prüfungskommission

Vorsitzende: Prof. Dr. habil. Ping Zhang

1. Berichterstattender: Prof. Dr.-Ing. Wolfram H. Wellßow

2. Berichterstattender: Prof. Dr.-Ing. Rolf Witzmann

## Acknowledgements

This dissertation is the result of my research activities at the Chair for “Energy Systems and Energy Management” of the University of Kaiserslautern, where I spent the last six years. Numerous people have supported me during this time.

First and foremost, I would like to express my deepest gratitude to my supervisor, Prof. Dr.-Ing. Wolfram H. Wellssow, who offered his continuous advice and encouragement in my research. His patience, motivation, enthusiasm, and immense knowledge led me to great progress in the writing of this dissertation.

I am also very grateful to Prof. Dr.-Ing. Rolf Witzmann from the Technical University of Munich, who kindly accepted to be the co-examiner of my dissertation. My sincere thanks also go to Prof. Dr. habil. Ping Zhang for her organization and support to make this dissertation possible.

I really enjoyed my time at university and I want to thank all my colleagues and friends for having a good time in Kaiserslautern. In particular, I would like to express my sincere thanks to my students and student assistants for their valuable work which delivered important inputs for this dissertation.

Finally, I would like to thank my family for their great support and encouragement.

# Table of Contents

<b>ABBREVIATIONS .....</b>	<b>I</b>
<b>SYMBOLS.....</b>	<b>IV</b>
<b>1 INTRODUCTION .....</b>	<b>1</b>
1.1 Motivation.....	1
1.2 Outline of the Dissertation .....	2
<b>2 SMART GRID METRICS .....</b>	<b>3</b>
2.1 Smart Grid Definition .....	3
2.2 Targets of Grid Performance and Related Measures .....	5
<b>3 ANALYSIS AND SYSTEM MODELING .....</b>	<b>9</b>
3.1 Technical Scope of the Investigation.....	9
3.2 Target Definition.....	11
3.2.1 Equipment Loading below Rated Capacity .....	11
3.2.2 Voltage within Tolerance.....	12
3.2.3 Improvement of Supply Reliability .....	13
3.3 Measure Definition .....	15
3.3.1 Grid Concepts .....	15
3.3.2 Distribution System Automation .....	18
3.3.3 Power Management .....	21
3.4 System Modeling .....	24
3.4.1 Synthetic Low Voltage Grids .....	24
3.4.2 Synthetic Medium Voltage Grids .....	30
3.4.3 Residential Load.....	37
3.4.4 Distributed Generation.....	42
3.4.5 Distributed Storage.....	49
3.5 Grid Application.....	52
3.5.1 Distributed Generation Development .....	52
3.5.2 Load and Storage Forecasts .....	61
3.5.3 Application Scenarios .....	62
<b>4 MEASURE MODELING .....</b>	<b>64</b>
4.1 Grid Reinforcement and Extension .....	64
4.1.1 Grid Reinforcement .....	64
4.1.2 Grid Extension.....	65
4.2 Alternative Grid Configuration .....	66
4.2.1 Grid Topology .....	66
4.2.2 Neutral Point Treatment.....	69

<b>4.3 Advanced Equipment .....</b>	<b>69</b>
4.3.1 Introduction .....	69
4.3.2 Direct Voltage Regulation .....	70
4.3.3 Reactive Power Management.....	72
4.3.4 Voltage Control Coordination .....	75
<b>4.4 Distribution System Automation.....</b>	<b>77</b>
4.4.1 Introduction .....	77
4.4.2 Supply Restoration Process.....	78
4.4.3 Impact of Distribution System Automation in Supply Restoration .....	79
4.4.4 Reliability Input Data.....	81
<b>4.5 Demand Side Integration .....</b>	<b>82</b>
4.5.1 Time of Use Tariff.....	82
4.5.2 Real-Time Pricing Tariff.....	84
4.5.3 Direct Load Control .....	84
<b>4.6 Distributed Storage Management.....</b>	<b>85</b>
4.6.1 Autarkic Management .....	85
4.6.2 Autarkic Management with Feed-in Control .....	86
4.6.3 Grid Management with Remote Control .....	87
<b>4.7 Distributed Generation Management .....</b>	<b>87</b>
4.7.1 Introduction .....	87
4.7.2 Passive Feed-in Management .....	88
4.7.3 Active Feed-in Management.....	89
<b>4.8 Virtual Power Plant .....</b>	<b>90</b>
4.8.1 Introduction .....	90
4.8.2 Grid Management in the Low Voltage Grid .....	91
4.8.3 Grid Management in the Medium Voltage Grid .....	92
<b>5 EVALUATION APPROACH .....</b>	<b>93</b>
<b>5.1 Technical Evaluation Approach .....</b>	<b>93</b>
5.1.1 Power Flow Analysis.....	93
5.1.2 Reliability Analysis.....	96
<b>5.2 Economic Analysis .....</b>	<b>97</b>
5.2.1 Investment and Operation Costs .....	97
5.2.2 Economic Evaluation Approach .....	98
<b>6 SIMULATION RESULTS .....</b>	<b>99</b>
<b>6.1 Evaluation with Synthetic Low Voltage Grids .....</b>	<b>99</b>
6.1.1 Selection of Synthetic Low Voltage Grids .....	99
6.1.2 Keeping Operational Limits in Low Voltage Grids.....	102
<b>6.2 Evaluation with Synthetic Medium Voltage Grids.....</b>	<b>129</b>
6.2.1 Selection of Synthetic Medium Voltage Grids .....	129
6.2.2 Keeping Operational Limits in Medium Voltage Grids.....	131

6.3	Improving Reliability in Medium Voltage Grids.....	148
<b>7</b>	<b>CONCLUSION.....</b>	<b>151</b>
7.1	Summary .....	151
7.2	Outlook .....	154
<b>8</b>	<b>REFERENCES.....</b>	<b>155</b>
<b>9</b>	<b>APPENDIX.....</b>	<b>166</b>
9.1	Synthetic Distribution System .....	166
9.1.1	Low Voltage Grids.....	166
9.1.2	Medium Voltage Grids.....	169
9.1.3	Electric Load.....	179
9.1.4	Distributed Generation.....	180
9.1.5	Distributed Storage.....	180
9.2	Application Scenarios.....	181
9.2.1	Low Voltage Grid Scenarios .....	181
9.2.2	Medium Voltage Grid Scenarios .....	182
9.3	Economic Data .....	184
<b>LIST OF FIGURES .....</b>		<b>186</b>
<b>LIST OF TABLES.....</b>		<b>190</b>
<b>ZUSAMMENFASSUNG.....</b>		<b>191</b>
