

Mertol Gökelma

**Settling and Agglomeration
Behaviour of Non-metallic
Inclusions in Aluminium Melts**

“Settling and Agglomeration Behaviour of Non-metallic Inclusions in Aluminium Melts,,

From the Faculty of Georesources and Materials Engineering of the
RWTH Aachen University

Submitted by

Mertol Gökelma, M.Sc.

from İzmir (Turkey)

in respect of the academic degree of

Doctor of Engineering

approved thesis

Advisors:

Univ.-Prof. Dr.-Ing. Dr. h.c. (UA) Karl Bernhard Friedrich

Univ.-Prof. Dr.-Ing. Gabriella Tranell

Prof. Dr.-Ing. Georg Rombach

Date of the oral examination: 20. April 2018

Schriftenreihe des IME

Band 56

Mertol Gökelma

**Settling and Agglomeration Behaviour of
Non-metallic Inclusions in Aluminium Melts**

Acknowledgement

First, I would like to express my sincere gratitude to my advisor, Univ.-Prof. Dr.-Ing. Dr. h.c. Karl Bernhard Friedrich, the director of IME, for his continuous support, knowledge, patience as well as his humanistic backing since my bachelor studies.

Second, I would like to thank my co-advisor Univ.-Prof. Dr.-Ing. Gabriella Tranell from Norwegian University of Science and Technology for her constructive comments on my dissertation. In addition, I express my deepest thanks to Prof. Dr.-Ing. Georg Rombach from Hydro Aluminium Rolled Products GmbH for taking part in my thesis committee.

I thank my fellow colleagues Songül Sieben, Marion Thoraval, Regina Dittrich, Semiramis Friedrich, Fabian Diaz, Alexander Birich, Danilo Curtolo, Nikolaus Borowski and Srecko Stopic for their human support and their technical discussions during my time at IME. I would like to thank the technical and administrative staff of IME for their practical support which helped to progress the research activities without any obstacles. My special thanks goes to my master students Susanna Giulia Barberi, Fabian Botz, Wasif Hkan, Kiran Prateek Kankanti, Lu Lin, Timon Paulus and Christin Stallmeister for their eagerness in taking part in research activities.

I am very grateful to the management of the Open Innovation Research Cluster AMAP and the team behind the project 'Melt Cleanliness': Johannes Morscheiser from Aleris Rolled Products Germany, Mark Badowski from Hydro Aluminium Rolled Products, Thien Dang from Trimet Aluminium SE, Sebastian Fischer and Sebastian Tewes from Nemak Europe and Pierre Le Brun from Constellium Technology Center. I thank them for their professional support during the project. In addition, I would like to thank to our Steering Committee for their valuable time and knowledge.

A special thanks to my mother. I am very grateful for all of the sacrifices that she has made on my behalf. I would also like to thank my brother, cousins and all of my friends who supported me to achieve my goal.

1	Introduction	1
2	State of the Art.....	2
2.1	Aluminium Production Chain.....	2
2.2	Aluminium Products with High Purity.....	3
2.3	The Main Destructive Inclusions in Aluminium Melts	5
2.3.1	Oxides	5
2.3.2	Carbides.....	6
2.3.3	Borides.....	8
2.3.4	Nitrides	9
2.4	Mobility of Non-metallic Particles in Molten Phases	9
2.4.1	Settling Behaviour of Particles in Melts and its Mathematical Description	11
2.4.2	Particle Agglomeration and Cluster Break-up Phenomena	19
2.5	Inclusion Removal Methods.....	25
2.5.1	Flotation	25
2.5.2	Filtration	27
2.5.3	Sedimentation	31
2.6	Characterization and Detection Methods of Inclusions in Aluminium Melts	33
2.6.1	LiMCA	34
2.6.2	PoDFA	37
2.6.3	Other Methods.....	40
3	Modelling of Inclusion and Melt Movement	42
3.1	Analytical Description of Melt Flow based on Temperature Measurements and Numerical Simulation Results	42
3.1.1	Experimental and Analytical Procedure.....	42
3.1.2	Results and Discussion	43
3.2	Analytical Description of Particle Settling in Aluminium Melts	45

Content

3.3	Settling Tests of Ceramic Particles in Water	52
3.3.1	Experimental Work.....	52
3.3.2	Results and Discussion	53
3.4	Conclusions of the Settling Tests in Water	54
4	Particle Settling and Agglomeration in Molten Aluminium.....	55
4.1	Preparation of Aluminium Matrix Composites with Defined Inclusion Types	55
4.1.1	Experimental Results of MMC Preparation.....	57
4.1.2	Conclusions of MMC Preparation Experiments	59
4.2	Sedimentation Experiments.....	60
4.2.1	Experimental Lay-out and Procedure.....	60
4.2.2	Experimental Results and Discussion of Sedimentation Trials	62
4.2.3	Conclusions of Sedimentation Experiments	82
4.3	Agglomeration Experiments	84
4.3.1	Experimental Lay-out and Procedure.....	84
4.3.2	Experimental Results and Discussion of Agglomeration Experiments	85
4.3.3	Conclusion of Agglomeration Experiments.....	90
5	Scientific Assessment	91
	Sedimentation model of the demo-scale crucible furnace	92
6	Conclusions and Future Prospective.....	94
7	Attachments.....	97
