

Tanja Trosch

Development of a Platinum Casting Alloy for Jewelry and Watchmaking

Development of a Platinum Casting Alloy for Jewelry and Watchmaking

Von der Fakultät für Ingenieurwissenschaften
der Universität Bayreuth
zur Erlangung der Würde einer
Doktor-Ingenieurin (Dr.-Ing.)
genehmigte Dissertation

von
M.Sc. Tanja Trosch
aus
Roth

Erstgutachter: Prof. Dr.-Ing. habil. Uwe Glatzel
Zweitgutachter: Prof. Dr. rer. nat. habil. Dr. h.c. Markus Rettenmayr

Tag der mündlichen Prüfung: 24.07.2018

Lehrstuhl Metallische Werkstoffe
Universität Bayreuth
2018

Berichte aus der Materialwissenschaft

Tanja Trosch

**Development of a Platinum Casting Alloy
for Jewelry and Watchmaking**

Shaker Verlag

Table of Contents

1	Introduction	1
2	Requirements for the future platinum jewelry alloy.....	3
3	Development of alloy compositions.....	6
3.1	Suitability of alloying elements.....	6
3.2	Current ternary platinum alloys for jewelry application	8
4	Ranking of elements and their concentrations.....	10
4.1	Concentration of maximum solubility: $c_{\max, \text{sol}}$	10
4.2	Hardness index: h_i	11
4.3	Melting interval index: m_{ii}	12
4.4	Liquidus temperature change index: T_{li}	14
4.5	Summary of element ranking	15
5	Materials and methods.....	18
5.1	Alloy production.....	18
5.1.1	Arc melting.....	18
5.1.2	Precision casting process.....	18
5.2	Heat treatment, hot isostatic pressing.....	27
5.3	Brazing simulation by annealing	28
5.4	Evaluation of melting interval.....	28
5.5	Microstructural characterization.....	29
5.5.1	Preparation of metallographic samples	29
5.5.2	Optical microscope.....	29
5.5.3	Scanning electron microscope.....	29
5.5.4	Electron backscatter diffraction.....	30
5.5.5	X-ray diffraction.....	30
5.6	Mechanical properties	30
5.6.1	Hardness measurements	30
5.6.2	Tensile tests	30
5.7	Optical properties	32
5.7.1	Reflectance	32
5.7.2	Color.....	33
5.7.3	Tarnish resistance	34
6	Results and discussion	35

6.1	First alloy iteration produced only by arc melting	35
6.1.1	Composition of alloys of first iteration	35
6.1.2	T _s and T _i predictions by ThermoCalc and T _s measurement during arc melting....	36
6.1.3	Microstructure of the arc melted samples of the first iteration	38
6.1.4	Hardness of the arc melted samples of the first iteration	44
6.1.5	Summary of first alloy iteration	45
6.2	Second alloy iteration produced only by arc melting.....	47
6.2.1	Composition of alloys of second iteration.....	47
6.2.2	T _s and T _i predictions by ThermoCalc and T _s measurement during arc melting....	49
6.2.3	Microstructure of the arc melted samples of the second iteration.....	51
6.2.4	Hardness of the arc melted samples of the second iteration.....	58
6.2.5	Summary of second alloy iteration.....	59
7	Precision casting.....	62
7.1.1	Melting temperatures measured during precision casting	62
7.1.2	Form filling and reaction with the mold material.....	62
7.1.3	Microstructure of as-cast samples	65
7.1.4	Microstructure of cast + HIP processed samples	73
7.1.5	Microstructure after annealing	77
7.1.6	Mechanical properties of as-cast samples	80
7.1.7	Mechanical properties of cast + HIP processed samples	84
7.1.8	Mechanical properties after arc melting + annealing	88
7.1.9	Color of as-cast samples.....	89
7.1.10	Reflectance of as-cast samples	90
7.1.11	Tarnish resistance after arc melting + annealing.....	91
7.2	Comparison and final selection	92
7.3	Optimization of casting parameters.....	94
8	Final discussion	97
9	Summary.....	99
10	Zusammenfassung	101
	References	103
	List of Abbreviations.....	109
	Danksagung.....	111
	Lebenslauf	112
