Dynamic Fault Handling and Reconfiguration for Industrial Automation Systems

Von der Fakultät Informatik, Elektrotechnik und Informationstechnik
der Universität Stuttgart zur Erlangung der Würde eines
Doktor-Ingenieurs (Dr.-Ing.) genehmigte Abhandlung

Vorgelegt von
Huiqiang Wang
aus Shandong, China

Hauptberichter: Prof. Dr.-Ing. Dr. h. c. Michael Weyrich
Mitberichter: Prof. Dr.-Ing. Birgit Vogel-Heuser

Tag der Einreichung: 13.06.2018
Tag der mündlichen Prüfung: 05.10.2018

Die vorliegende Arbeit entstand während meiner Tätigkeit als wissenschaftlicher Mitarbeiter am Institut für Automatisierungstechnik und Softwaresysteme (IAS) der Universität Stuttgart.

Mein besonderer Dank gilt meinem Doktorvater und Leiter des Instituts, Herrn Prof. Dr.-Ing. Dr. h. c. Michael Weyrich, für die fortwährende Unterstützung während der Entstehung der Arbeit, die zahlreichen wertvollen Anregungen und kritischen Diskussion sowie die Übernahme des Hauptberichts.

Frau Prof. Dr.-Ing. Brigit Vogel-Heuser danke ich für das Interesse an meiner Arbeit und die Übernahme des Mitberichts.

Ein herzlicher Dank gilt Herrn Dr.-Ing. Nasser Jazdi für sein Engagement und die wertvollen Aussprachen zum Forschungsthema und zu Fragen des beruflichen Alltags. Allen ehemaligen Kolleginnen und Kollegen am IAS gilt mein herzlicher Dank für die gute Zusammenarbeit.

Ebenso gilt mein Dank den Studierenden, die im Rahmen ihrer Master-, Studien-, Forschungs- und Bachelorarbeiten einen Beitrag zum Gelingen dieser Arbeit geleistet haben.

Schließlich danke ich meinen Eltern für die langjährige und fortwährende Unterstützung.

Stuttgart, im Oktober 2018

Huiqiang Wang

Table of Contents

List of Figures	iv
List of Tables	vi
List of Abbreviations.....	vii
Glossary.....	viii
Zusammenfassung.....	xi
Abstract.....	xii
1 Introduction.....	1
1.1 Background and Motivation	1
1.2 Challenges of Maintenance for Industrial Automation Systems	2
1.3 Objective of the Research Work.....	4
1.4 Overview regarding the Thesis.....	5
2 Fundamentals of Fault Handling and Reconfiguration for Industrial Automation Systems.....	10
2.1 Basics of Industrial Automation Systems.....	10
2.1.1 Definition of Industrial Automation Systems	10
2.1.2 Availability	11
2.1.3 System model.....	12
2.2 Fault Handling for Industrial Automation Systems	13
2.2.1 Fault	13
2.2.2 Symptom	15
2.2.3 Fault Handling in Maintenance.....	15
2.2.4 Principle Procedure of the Fault Handling	18
2.3 Reconfiguration of Industrial Automation Systems	19
2.3.1 Reconfiguration	19
2.3.2 Relationship between Reconfiguration and Fault handling for Industrial Automation system	20
2.4 Requirement analysis of the Dynamic Fault Handling and Reconfiguration	21
3 Survey of Methods concerning Handling Faults and System Modeling	24
3.1 Survey of the Methods for Handling Faults	24
3.1.1 Fault Prevention of Handling Faults	24
3.1.2 Fault Tolerance of Handling Faults	25
3.1.3 Fault Removal of Handling Faults.....	26
3.1.4 Fault Forecasting of Handling Faults.....	27
3.1.5 Model-based Approaches	27
3.1.6 Assessment of the Surveyed Methods	37
3.2 Survey of the Conceptions of System Modeling	39

3.2.1	Process-oriented System Modeling	41
3.2.2	Data-oriented System Modeling	42
3.2.3	State-oriented System Modeling.....	44
3.2.4	Object-oriented System Modeling.....	46
3.2.5	Assessment of the Surveyed Modeling Methods.....	48
4	Modeling of Industrial Automation Systems.....	52
4.1	Representation of an Industrial Automation System from three Perspectives	52
4.1.1	Physical Description (Component Model)	54
4.1.2	Logical Description (Function Model)	57
4.1.3	Description of Qualitative Requirements (Requirement Model).....	61
4.2	Formalization of the System Model via Matrices and Rules as System Knowledge ..	64
4.2.1	Formalization of Simple Relations via Matrices	64
4.2.2	Formalization of Complex Relations via Rules.....	67
5	Conception of Dynamic Fault Handling and Reconfiguration	71
5.1	Overview of the Conception of Dynamic Fault Handling and Reconfiguration.....	73
5.2	Knowledge for the Dynamic Fault Handling and Reconfiguration.....	76
5.3	Handling a Known Fault.....	77
5.4	Handling a New Fault.....	79
5.5	Fault Localization for a New Fault.....	80
5.5.1	Principle of Generating the List of Symptoms	82
5.5.2	Fault Localization Procedure.....	84
5.5.3	Example of the Fault Localization.....	85
5.6	Identification of Available Functions	88
5.6.1	Overview of Identification of Available Functions based on the Fault Location	89
5.6.2	Identification of not-affected Functions via Function Model.....	91
5.6.3	Identification of Available Functions via Requirement Model	96
5.7	Reconfiguration based on the Available Functions	100
5.7.1	Estimation of the Reconfiguration Types and Verification of Current Tasks	101
5.7.2	Procedure of the Reconfiguration based on Available Functions.....	102
5.7.3	An Example for the Reconfiguration.....	103
5.8	System Recovery after the Reparation	104
6	Realization and Evaluation of the Conception	107
6.1	Realization of the Conception	107
6.1.1	Overview of the System Architecture.....	107
6.1.2	Software Architecture	109
6.1.3	Realization of Fault Handling Knowledge	110
6.1.4	Realization of Data Format and Communication Type	112
6.1.5	Development of Interfaces between local Systems and a Server	113
6.1.6	Prototype of the Conception	115
6.1.7	Evaluation of the Conception	118
6.2	Evaluation of the Conception on the Two-Tank System Simulator	121
6.3	Evaluation of the Conception on the Coffee Maker Simulator	125
6.4	Evaluation of the Conception on the High-bay Warehouse Simulator	129

6.5	Summary of the Demonstrators	133
6.6	Assessment of the Dynamic Fault Handling and Reconfiguration System regarding the Requirements	140
7	Conclusion and Future Work	144
7.1	Summary and Contribution of the Research.....	144
7.2	Limitations of the Concept	146
7.3	Future Work.....	147
	Bibliography	148
	Appendix A	162
	Appendix B	164
