**Electrolytic anodic
dissolution of Ti, Al and V
in LiCl - KCl_(eut) based
molten salts**

Electrolytic anodic dissolution of Ti, Al and V in LiCl - KCl_(eut) based molten salts

Von der Fakultät für Georessourcen und Materialtechnik der
Rheinisch-Westfälischen Technischen Hochschule Aachen

zur Erlangung des akademischen Grades einer

Doktorin der Ingenieurwissenschaften

genehmigte Dissertation

vorgelegt von

M.Sc. Ksenija Milićević Neumann

aus Zrenjanin, Serbien

Berichter: Herr Univ.-Prof. Dr.-Ing. Dr. h. c. Bernd Friedrich
Herr apl. Prof. Dr. habil. Marian Jaskula
Frau Prof. Dr. Jasmina Stevanovic

Tag der mündlichen Prüfung: 29.04.2021

Schriftenreihe des IME

Band 75

Acknowledgment

We are able to shape the (physical) world around us but we are formed by the people in our lives unleashing our creativities and capabilities for such an act

My big gratitude goes to Prof. Dr.-Ing. Dr.h.c. Karl Berndhard Friedrich, a mentor and supervisor for giving me an opportunity to work on this thesis, an enormous amount of trust and belief in my doings as well as continous support toward my professional and personal growth.

To Prof. Dr. habil. Marian Jaskula and Prof. Dr.-Ing. Jasmina Stevanovic I am very thankful for taking the roles of examiners, the time they have invested in improving this thesis and their useful suggestions.

I would also like to express my appreciation to Dr. Joachim Gussone and Dr. Jan Haubrich from German Aerospace Centre (DLR) for their tremendous help and guidance through the worlds of electrochemistry and materials as well as the contributions during measurements and evaluation of the results.

Priv. Doz. Dr.-Ing. habil. Srecko Stopic and his family I am grateful for making my doctoral journey possible and creating a pleasant atmosphere during my time in Aachen.

Special thanks goes to my husband Marcel Neumann for his unconditional love and support which gave me a strength to accomplish this big life milestone. I highly appreciate also his engagement in technical corrections and thoughtful advices.

This thesis wouldn't be complete without my supergirls, Dr.-Ing. Sanja Seslija, Lilian Schwich, Sarah Fleischer and Élodie Trojanowski, their encouraging words, smiles and positiveness that has been uplifting.

To my parents Rade and Vesna Milicevic, brother Jovan and close family members I can't thank enough with words for all their devotion, sacrifices and faith in reaching these heights.

Contents

Kurzfassung	VII
Abstract	IX
Extended Abstract	XI
1 Introduction	1
2 Background	3
2.1 Titanium Matrix Composites - TMC	3
2.1.1 Production methods	4
2.2 Titanium alloys	6
2.2.1 Production routes	7
2.3 Titanium reduction technologies	8
2.3.1 Electrochemistry of titanium in chloride melts	9
2.4 Aluminium technologies	13
2.4.1 Electrochemistry of aluminium in chloride melts	14
2.5 Vanadium technologies	16
2.5.1 Electrochemistry of vanadium in chloride melts	16
2.6 Electrochemistry of binary systems containing Ti-, Al- and V elements	19
2.7 Concept of research	21
3 Thermochemical considerations and calculations	24
3.1 Phase diagrams	24
3.2 FactSage calculations	26
3.3 Summary	30
4 Experimental work	31
4.1 Setup and materials	31
4.2 Principles of procedures and methods applied in work	34
4.2.1 Electrochemical techniques	34
4.2.2 Analytical methods	39
5 Results	41
5.1 Electrochemical investigations of electrolytes	41
5.1.1 $\text{LiCl-KCl}_{(\text{eut})}$ melt	41
5.1.2 $\text{LiCl-KCl}_{(\text{eut})}\text{-TiCl}_2$	43
5.1.3 $\text{LiCl-KCl}_{(\text{eut})}\text{-AlCl}_3$	46

5.1.4	LiCl–KCl _(eut) –VCl ₃	49
5.2	Vanadium anode	51
5.2.1	LiCl–KCl(eut)	52
5.2.2	Electrochemical measurements in LiCl–KCl–TiCl ₂	60
5.3	Aluminium anode	68
5.3.1	LiCl–KCl(eut)	68
5.3.2	LiCl–KCl–TiCl ₂	73
5.4	Titanium anode	79
5.4.1	LiCl–KCl–AlCl ₃	79
5.4.2	LiCl–KCl–VCl ₃ / VCl ₂	89
5.5	Assesment of the results	98
6	Conclusion and outlook	101
	Bibliography	102
	Appendix	121
